

The Pulse of Efficiency: An HR Switch Delivers Major Time Savings

Teresa Wolfe, HR Manager

“The biggest benefits are *time, accuracy, and reliability*. Everything happens behind the scenes.”

Prior to Paycor

Kansas Heart Hospital faced significant challenges managing employee data across multiple platforms. Their previous system required manual data entry for new hires, benefit elections, and time tracking. **This process was time-consuming, prone to errors, and limited employees' access to their own information.** Teresa Wolf, HR Manager, describes it as “an extremely manual process with a lot of double-checking, making sure the two systems were in sync.” **This manual workload placed a significant burden on HR and limited their ability to focus on strategic initiatives.**

Partnership with Paycor

Implementing Paycor with its integrated Employee Navigator solution transformed HR processes at Kansas Heart Hospital.

The automated data transfer **eliminated manual entry**, saving Teresa significant time and reducing errors. The Paycor mobile app **empowered employees** with self-service access to their information, including pay stubs, benefits, and time-off requests. And the shift-swapping feature within the app **streamlined scheduling** for both employees and managers.

Challenges

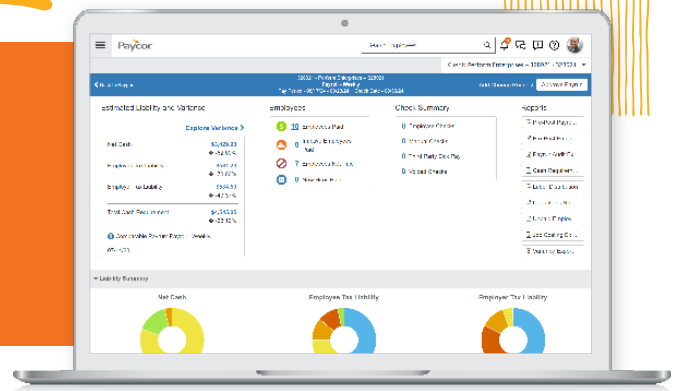

- Manual Data Entry
- Time Consuming Processes
- Limited Employee Access
- Inefficient Scheduling

Solutions & Key Features

- Automated Data Transfer
- Paycor Mobile App
- Employee Self-Service
- Shift Swapping
- Single Sign-On

Eliminated hours of time spent verifying the accuracy of manual data entry.

Time Savings through Automation

Paycor's integration with Employee Navigator automates the flow of employee data, **eliminating the need for manual entry and freeing up valuable time.** This automation enables Teresa to focus on critical training and development initiatives.

Empowering Employees with the Paycor Mobile App

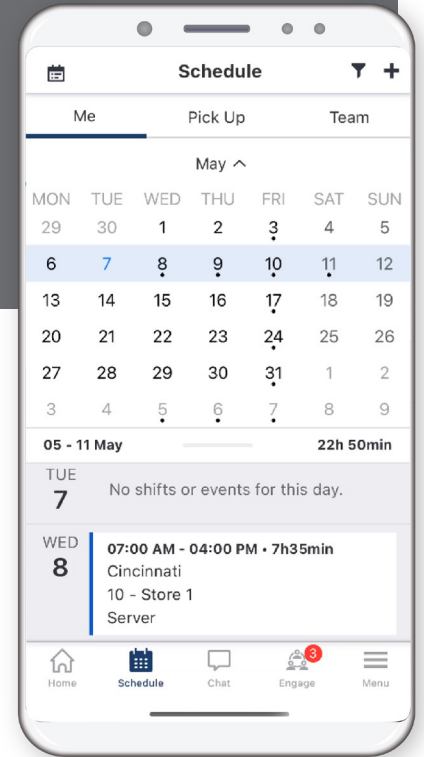

The Paycor mobile app provides employees with 24/7 access to their pay stubs, benefits information, and time-off requests. **This self-service capability empowers employees and reduces the administrative burden on HR.**

Streamlining Scheduling with Shift Swapping

The shift-swapping feature has significantly improved scheduling efficiency. Employees can easily trade shifts with colleagues, and managers receive automatic notifications, eliminating the need for manual intervention.

Paycor's solutions help Kansas Heart Hospital improve their onboarding process and boost employee engagement.

- Payroll
- Time
- HR
- Mobile App

The mobile app is huge.
Our previous provider
was locked down like Fort
Knox. It was very hard for
my employees to get in
remotely. The employees
love Paycor Mobile.
